DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 2-9-2004 was considered by the examiner.

Drawings

3. The content of the drawings are approved by the examiner.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2852

6. Claims 1-4, 7-8, 10-13, 15, and 18-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura et al. (cited by applicant 2000-338818a) in view of Hirst et al. (6,445,902).

Nakamura et al. teaches a first heating member having an internal heat supply 91 and a second heating member having a surface heating means 93. Nakamura et al. does not teach an induction heating means.

Hirst et al. teaches an external induction heating means (Figure 5). Hirst et al. teaches that it is conventional to use an external induction heating means and an external roller heated by a halogen type heater for the heating means for a pressure roller or fixing roller. It would have been obvious to one of ordinary skill in the art to use the teaching of Hirst et al. with the image forming device of Nakamura et al. since both are functionally equivalent for heating the pressure member.

Prior Art

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Katayanagi et al., Onishi, Tanaka et al., Yokoyama, and Fujimori et al. teach pertinent prior art.

Allowable Subject Matter

8. Claims 5-6, 9, 14, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
